

## AMT Marine & Industrial Engineering Quality Policy 2016

Within AMT Marine & Industrial Engineering Ltd we are committed to provide marine and industrial engineering services, which meet the customers' specified contractual and project requirements. We are totally committed to setting and achieving quality standards that are capable of meeting, in all respects, the specified requirements and reasonable expectations of our customers and any legal requirements.

It is the policy therefore, of AMT to control and conduct its business of engineering services be those marine or industrial, by means of a formalised system of modern quality management. This quality management shall be in accordance with the quality system requirements specified in the appropriate European Harmonised Directives and in accordance with the principles of ISO 9001 specific requirements.

AMT shall develop and maintain a Quality Management System that conforms to the requirements of ISO 9001 so that we can provide and maintain a consistent high quality in all engineering services provided, by the use of proper communication, work control and accountable records for all work undertaken.

AMT will develop and monitor quality objectives that relate to business activities. AMT will strive to achieve continual improvement not only in satisfying customer expectations but also in reference to the effectiveness of the QMS in relation to business practise.

All members of AMT staff are charged with promoting these aims and are required to familiarise themselves with the contents of the AMT Quality Manual which defines the Quality Management System that has been established and adopted as the means for achieving these declared objectives. Everyone connected with AMT shall be supported according to their individual needs for personal development, training and facilities. Quality shall be the responsibility of everyone, in every activity, throughout AMT.

Michael Thomas  
Managing Director  
AMT Marine & Industrial Engineering Ltd
